Pergola Installation:

- 1. How is the choice of wood for the pergola linked to its ability to withstand outdoor conditions and provide lasting shade?**
 - Recycled Ulin ironwood is chosen for pergolas due to its exceptional ability to endure outdoor conditions, offering lasting shade and beauty.
- 2. Can the design and dimensions of the pergola be adjusted to fit specific outdoor spaces or preferences?**
 - Naturanexa offers flexibility in customizing the design and dimensions of our pergolas to perfectly complement specific outdoor spaces and preferences.
- 3. What care and maintenance routines should be followed to extend the lifespan of the pergola?**
 - Regular cleaning and occasional oiling are recommended care practices to extend the lifespan and preserve the appearance of our recycled Ulin ironwood pergolas.

Kit House Construction:

- 1. What sustainability practices are employed in the construction of kit houses, including the sourcing of materials?**
 - Naturanexa prioritizes sustainability, constructing kit houses with recycled Ulin ironwood and other eco-friendly materials sourced from reclaimed sources.
- 2. Are these kit houses customizable in terms of design, layout, and finishes?**
 - Yes, our kit houses offer a high degree of customization, allowing clients to tailor the design, layout, and finishes to their specific needs and preferences.
- 3. What level of structural integrity and energy efficiency can be expected from these kit houses?**

NATURANEXA

- Our kit houses are known for robust structural integrity and energy efficiency, combining the strength of recycled Ulin ironwood with thoughtful design considerations for sustainable living spaces.

General Questions:

1. Do you provide installation services for your products?

- We don't offer installation services directly. However, we can recommend reliable third-party professionals to ensure proper installation.

2. Do you arrange transportation for purchased items?

- While we don't handle transportation, we can assist by recommending trusted third-party logistics services for safe and efficient delivery.

3. Do you offer on-site measurement services?

- We don't conduct on-site measurements. For accurate measurements, we recommend engaging a professional measurement service, and we're happy to assist in finding suitable providers.

4. What technical assistance can Naturanexa provide?

- We offer technical guidance and information within our capabilities. If you have specific questions or need assistance, feel free to reach out, and we'll do our best to help.
